Professional Summary

Execution-driven Software Engineer and final-year BS candidate with extensive experience shipping production-grade backend systems, distributed architectures, and AI-powered applications. Proven ability to architect scalable microservices and integrate complex AI/ML pipelines (LLMs, Computer Vision, RAG) for real-world deployment. Currently employed as a Full Stack Developer at Adzoira, leveraging modern web technologies to deliver high-quality client solutions. Recognized for independent ownership, rapid adaptation to new tech stacks, and strong focus on code quality and testing.

Core Technical Skills

Languages: Python, Java, C#, PHP, JavaScript, TypeScript, Kotlin, SQL, C++, Bash

Backend Engineering: ASP.NET Core, Spring Boot, FastAPI, Flask, Node.js, REST APIs, WebSockets, JWT Authentication, RBAC, Microservices, API Gateway Design

Frontend / Mobile: React, Next.js, HTML5, CSS3, Tailwind CSS, Android (Jetpack Compose, MVVM, Retrofit, Room, Hilt)

Databases & Cloud: PostgreSQL, MySQL, Redis, SQLite, Firebase, Supabase (Edge Functions, Auth), Docker, Kubernetes, GitHub Actions, CI/CD, Microsoft Azure

AI / ML / Computer Vision: Machine Learning, Deep Learning, PyTorch, Neural Networks, CNNs, Transfer Learning, Computer Vision, OpenCV, Vision Transformers (ViT), Multimodal Learning, RAG Pipelines, FAISS, BM25, Sentence Transformers

Engineering Practices: Git, SonarQube, Jira, Agile / Scrum, SDLC, Manual & Automated Testing, Static Analysis, Performance Optimization

Professional Experience

Full Stack Developer

Jan 2026 – Present

Adzoira (www.adzoira.com) – Remote

- Developing scalable full-stack web applications using React, TypeScript, and Supabase, delivering responsive user interfaces and robust backend logic.
- Implementing serverless architectures utilizing Supabase Edge Functions to optimize application performance and reduce latency for global users.
- Ensuring system reliability and stability by conducting rigorous manual QA cycles, feature testing, and debugging prior to production releases.
- Collaborating with cross-functional teams to translate design requirements into high-quality code, maintaining strict adherence to modern web standards.
- Optimizing database schemas and queries within Supabase/PostgreSQL to ensure data integrity and fast retrieval speeds.

Full-Stack Software Engineer (Contract)

Mar 2026 – Apr 2026

ProEMS – Corporate Event Management Platform (Remote)

- Architected and delivered a complete enterprise-grade event management platform from scratch using React, FastAPI, PostgreSQL, and Supabase.
- Built secure RESTful APIs with JWT authentication and role-based access control for multi-user workflows.
- Designed normalized relational schemas for users, registrations, schedules, reporting, and audit workflows.
- Applied SonarQube static analysis to improve maintainability and eliminate quality issues before handover.
- Delivered deployment workflow, technical documentation, and post-launch support.

Software Engineer (Contract)

Nov 2025 – Dec 2025

Event Ticketing Platform (Remote)

- Led end-to-end delivery of a production-ready event ticketing platform within a 4-week client engagement.
- Designed backend architecture and implemented 15+ secure REST API endpoints.
- Enforced JWT-based RBAC for Admin, Organizer, and Attendee roles.
- Engineered PostgreSQL schema (8+ tables) with constraints, indexing, and transactional consistency.
- Built GitHub Actions CI/CD pipeline for automated testing and zero-downtime deployment to Microsoft Azure.
- Implemented PDF ticket generation, QR-based check-in system, and validated operational readiness with 100+ live ticket scan tests.

Flagship AI Projects

SkinSense – AI Dermatology Decision Support Platform Aug 2025 – May 2026

- Leading development of a healthcare AI platform combining dermatology image analysis with symptom-text reasoning.
- Built multimodal inference pipeline using Vision Transformers and language models for severity assessment.
- Engineered hybrid RAG architecture over medical literature using BM25, dense embeddings, FAISS indexing, and neural reranking.
- Designing confidence scoring and adaptive triage workflows for grounded clinical recommendations.
- Containerized services with Docker and orchestrated local clusters with Kubernetes for scalable model serving.
- Final Year Project focused on practical deployment of trustworthy healthcare AI systems.

Software Engineering Projects

DreamCanvas – Polyglot Microservices Platform Jun 2025 – Aug 2025

- Designed distributed 9-service architecture using Node.js, Flask, PostgreSQL, and Redis.
- Implemented central API Gateway for routing, authentication, and service orchestration.
- Authored Kubernetes manifests including Deployments, StatefulSets, Services, Ingress, ConfigMaps, Secrets, and PVCs.
- Added Redis-backed caching and messaging patterns for scalable inter-service communication.

Loom – AI Social Content Platform Feb 2025 – May 2025

- Developed Reddit-style platform supporting posts, nested comments, voting, moderation, and profiles.
- Designed normalized MySQL schema (10+ tables) for high-volume user interaction workflows.
- Integrated Python ML service for real-time content quality scoring and moderation signals.
- Improved performance through indexing and query optimization, reducing latency significantly.

EShop – Multi-Role E-Commerce Platform Jan 2025 – Apr 2025

- Built transactional backend using Spring Boot and Spring Security.
- Implemented JWT authentication and RBAC for Customer, Store Owner, and Driver roles.
- Developed Android client using Jetpack Compose, MVVM, Hilt, Retrofit, and Room.

Education

FAST National University of Computer and Emerging Sciences (FAST-NUCES), Peshawar

Bachelor of Science in Software Engineering Aug 2022 – May 2026 (Expected)

Relevant Coursework: Applied Artificial Intelligence, Applied DevOps, Information Security, Computer Networks, Design & Analysis of Algorithms, Database Systems, Operating Systems, Software Design & Architecture, Web Engineering, Software Quality Engineering, Probability & Statistics, Data Structures.

Leadership & Distinction

Aspire University Leader 2025 – Present
Aspire Institute Global

- Selected for a competitive international leadership fellowship.
- Contributed to student chapter initiatives focused on technical excellence and professional growth.
